MODERN CLASS

ENRICHMENT & STEAM

Where Curiosity Meets Creativity

Our afternoon enrichment blocks are led by specialists who bring a craft, a studio, or a business into the classroom. Four programs, four instructors, one goal: students who make, move, and think for themselves.

Ashley Kassan
INSTRUCTOR

YOGA

Students slow down, breathe, and reconnect through guided stretching and yoga. Sessions build flexibility, balance, and body awareness while giving kids practical tools to focus, manage stress, and self-regulate; calm that carries straight back into the classroom.

Ashley is an experienced instructor in Kundalini Yoga who shares her passion for mantra and meditation, recognizing that children are highly intuitive and responsive to the methods and techniques of yoga.

Kevin Palafox
DESIGN HIVE

CODING & MAKER ED

A hands-on adventure in engineering and computer science. Students build and program with LEGO Robotics SPIKE Prime, then level up to Scratch and microcomputers like micro:bit and MaKey MaKey. Delivered by a trusted learning partner, it turns curiosity into working robots, games, and inventions.

Kevin is a master coding and robotics instructor who oversees maker and STEAM programming at Overland Elementary School, and has taught engineering and robotics at Briskin Elementary, Turning Point School, and St. James's Episcopal School.

Jen Cefaly
CREATIVE OPERATIONS

ENTREPRENEURSHIP

Let's build a business! In collaboration with My Big Idea, students get a holistic entrepreneurship experience: product development, marketing, and more, eventually launching their own website and online store.

Jen's background in education, art, technology, curriculum development, and business operations brings a strong understanding of how products can be designed to be intuitive and engaging.

Honesty Carswell
EDUCATOR

STEAM

Science, technology, engineering, art, and math, taught as one project at a time. Students design, prototype, test, and present: building bridges, mixing pigments, coding light, and sketching the next version. Every block ends with something made and a question worth asking next.

Honesty leads our STEAM block, guiding students from first idea to finished prototype and helping them see how art and engineering work together.

Grow mind and body with Modern Class enrichment.
